## PROFESSIONAL OBJECTIVE

---

Full Stack Developer with 3+ years of experience building scalable web applications using PERN/MERN stacks. I integrate APIs, design and maintain robust backends and high-performance frontends with a focus on DX and UX. I work closely with design (Figma, v0) and business teams to iterate based on metrics (dashboards, Google Analytics) and prioritize impact. Experienced in SEO and event analytics.

## PROFESSIONAL EXPERIENCE

---

### Full Stack Developer

Aoki Agentes IA — August 2023 - Present

Development and maintenance of end-to-end web applications, integrating APIs and ensuring proper system functionality through continuous, data-driven improvements.

- Development and maintenance of React/Next.js frontends with TypeScript and Tailwind, focusing on Core Web Vitals and accessibility.
- Design handoff: close collaboration with the design team (Figma, v0) to define states, components, and visual guidelines.
- Data-driven UX/UI: analyzing dashboards and Google Analytics to identify friction, propose improvements, and design new screens.
- API integration and state/error management to ensure functional flow and clear user feedback.
- Collaboration with clients and other system teams for integrations; coordination with implementation during releases and post-deploy technical support.
- Optimization of assistant prompts to reduce hallucinations, improve data handling, processes, and query resolution.

### Full Stack Developer (Internship)

Prototypes Devs — January 2023 - August 2023

- Contributed to the development of web applications following Figma designs, combining frontend work with React, Next.js, and Tailwind, with backend module creation and endpoint development using Node.js, Express.js, MongoDB, and Mongoose.
- Prioritized performance, security, and scalability within an agile remote team.

### Full Stack Developer (Freelance)

December 2022 - January 2023

- Participated in the team development of a ticket management system, handling database design and template development using Node.js, Express.js, MongoDB, and Mongoose.
- Focused on performance, security, and scalability in an agile remote environment.

## EDUCATION

---

### Associate Degree in Programming

Universidad Tecnológica Nacional (2023 - Present)

### Full Stack Web Developer

Soy Henry (2022 - 2023)

## SKILLS

---

- Web interface development with React, Redux, Next.js, TypeScript, JavaScript, HTML, CSS, and Tailwind CSS, applying UX/UI, accessibility, and performance principles (Core Web Vitals).
- Collaboration with design teams using Figma and v0, transforming prototypes into functional components and optimizing user experience through Google Analytics and dashboards.
- Teamwork with backend and implementation teams under agile methodologies (SCRUM), using Git and GitHub, and integrating APIs and databases (MySQL, PostgreSQL, MongoDB).
